- 2.5. If there is any unwanted dropdown menu is selected, just unselect it to remove as Fig 2.5.1 and Fig 2.5.2

The image shows a form with four columns, each representing a dropdown menu configuration. Each column has a checked checkbox labeled "Add dropdown menu". The first column has a "Name of the dropdown menu" field with the value "Size" and four "Menu option name" fields with values "Small", "Medium", "Large", and "Extra Large". The second column has a "Name of the dropdown menu" field (empty) and one "Menu option name" field with the value "Option 1". The third column has a "Name of the dropdown menu" field (empty) and one "Menu option name" field with the value "Option 1". The fourth column has a "Name of the dropdown menu" field (empty) and one "Menu option name" field with the value "Option 1". Below each column are links for "add another option" and "remove option". The fourth column's "Add dropdown menu" checkbox is highlighted with a red box.

Fig 2.5.1

4. Button Creation Step 2 is shown in Fig 4.1

Step 2 : Track inventory,profit & loss (optional)

Track By Item

ItemID	Qty in stock	Alert qty.(optional)
<input type="text" value="00-1"/>	<input type="text" value="40"/>	<input type="text" value="3"/>

Track By Option

Can customers buy an item when it is sold out?

Yes, customers can buy the item as usual.

No, don't let customers buy the item.

Take customers to specific page when they click Continue Shopping button on "item sold out" page.

Ex: <http://www.mmprepaid.com/soldout.php>

Skip this step

Fig 4.1

4.1. "Track By Item" is selected as default and user need to add ItemID, Qty in stock and Alert Qty as needed. If user choose "Track By Option", user can define specific ItemID, Qty in Stock and Alert Qty for many kinds of Item Type. (Fig 4.1.1)

Track By Option

Red	<input type="text"/>	<input type="text"/>	<input type="text"/>
Green	<input type="text"/>	<input type="text"/>	<input type="text"/>
White	<input type="text"/>	<input type="text"/>	<input type="text"/>
Pink	<input type="text"/>	<input type="text"/>	<input type="text"/>

Fig 4.1.1

- 4.2. User can define the options what the customer can do after the item is sold out. Click "Next" button and Button Creation Step 2 is finished. (Fig 4.2.1)

Can customers buy an item when it is sold out?

Yes, customers can buy the item as usual.

No, don't let customers buy the item.

Take customers to specific page when they click Continue Shopping button on "item sold out" page.

Ex: <http://www.mmmprepaid.com/soldout.php>

Skip this step

Fig 4.2.1

5. Button Creation Step 3 is shown in Fig 5.1 and Fig 5.2. Please select the desired options for "Customized Checkout Pages" and click "Save" buttons.

Step 3 : Customized advanced features (optional)

MyanPay™
MyanPay Button Creation Wizard

Customize checkout Pages

If you are an advanced user, you can customize checkout pages for your customers, streamline checkout, and more in this section.

Do you want to let your customer change order quantities?
 Yes No

Can your customer add special instructions in a message to you?
 Yes No

Do you need Customer Shipping Address?
 Yes No

Take customers to this URL when they cancel their checkout

Fig 5.1

Take customers to this URL when they finish checkout

Advanced variables [What is this?](#)

Use a line break between each variable. The variables will appear in your button's HTML code.

Add advanced variables

Example
address_override=1
notify_url=https://www.mywebsite.com/MyanPayIPN

Fig 5.2

5.1. MyanPay Button Code will be produced as shown in Fig 5.1.1.

You've created your button

1. Click Select Code to select all the button code.
2. Copy the code (CTRL+C for windows, CMD+C for Mac — or right-click and choose Copy).
3. Paste the code into your own code (CTRL+V for Windows, CMD+V for Mac — or right-click and choose Paste).
