MyanPay API Integration with WordPress Woocommerce CMS

MyanPay API Generating

Step 1: Type www.myanpay.com.mm in your browser address bar. And type your business account username and password and click **Login** button.

The screenshot shows the MyanPay website homepage. The navigation menu includes Home, Personal, Business, and Developer. The main content area features a banner with the text "Start your online shop, Use MyanPay, Get Money" and three columns of information: "Getting Started", "How MyanPay Works", and "How much it costs". On the right side, there is a "MyanPay Account Login" form with fields for Username and Password, a Login button, and a link for "Can't access your account?". Below the login form is a "Create MyanPay Account" button.

Step 2: Please type the text below and Click the **Login** button.

The screenshot shows the MyanPay website with the CAPTCHA verification step. The navigation menu is the same as in the previous screenshot. The main content area displays a CAPTCHA box with the text "Enter the text below." and a blue box containing the characters "898d09". Below the CAPTCHA box is a text input field containing "898d09" and a "Login" button.

Step 3: Click **My Account** tab and click the **Profile**.

The screenshot shows the MyanPay user interface. At the top, there is a blue navigation bar with the MyanPay logo on the left and a 'Logout' button on the right. Below the navigation bar, there are several tabs: 'My Account' (highlighted with a red box), 'Send Money', 'Request Money', and 'Merchant Services'. Underneath these, there is a secondary navigation bar with tabs: 'Overview', 'Add Funds', 'Withdraw', 'Transaction History', 'Problem Solving Center', 'Profile' (highlighted with a red box), and 'Help & Support'. The main content area displays a welcome message for user 'miyamoto', account type 'Business', and status 'Unverified'. A balance box shows '00.00 Kyats'. Below this, there are links for 'All Activity', 'Payments received', and 'Payments send'. A section titled 'All Activity - Friday, July 1, 2016 to Tuesday, July 5, 2016' contains a 'No Transactions' message and pagination links 'First Previous Next Last'.

Step 4: Select the **Selling Preferences** Tab and Click **View API Access**.

The screenshot shows the 'Selling Preferences' page in the MyanPay interface. The 'Selling Preferences' tab is highlighted with a red box in the top navigation bar. Below the navigation bar, there are several sections, each with a blue header and a 'Go To' link: 'Shipping Address' (with fields for State: Yangon, Township: Other, Address Line: Thamine, and an 'Edit Shipping Address' link), 'Saved Buttons' (with a 'Go To: User Saved Buttons' link), 'Web Site Payment Preferences' (with a 'Go To: Web Site Payment Preferences' link), 'Custom Payment Page Style' (with a 'Go To: Custom Payment Page Style' link), and 'ExpressCheckout API Access' (with a 'Go To: View API Access' link highlighted by a red box).

Step 5: You will see the API Access Page and **Request API Credentials**.

My Account Send Money Request Money Merchant Services Logout

Overview Add Funds Withdraw Transaction History Problem Solving Center Profile Help & Support

API Access [Back To Profile](#)

An API (Application Programming Interface) allows MyanPay software to communicate with your online store or shopping cart.

Setting up API credentials

The following options to integrate your MyanPay payment solution with your online store or shopping cart.

Request API credentials to create your own API username and password.

This option applies to:

- Custom websites and online stores
- Pre-integrated shopping carts running on your own server

[Request API Credentials](#)

Step 6: In the **Request API Credentials** Page, click the **agree** button.

My Account Send Money Request Money Merchant Services Logout

Overview Add Funds Withdraw Transaction History Problem Solving Center Profile Help & Support

Request API Credentials

API credentials consist of three elements:

- An API username
- An API password and
- Either an API signature

If you're using a shopping cart or solution provider, ask whether you need an API signature.

Request API signature

If your shopping cart or solution provider has asked for an API username, password and signature or if you're developing a custom shopping cart.

[Agree](#) [Cancel](#)

Step 7: Then, you will get the API username, password and signature. You have to use those in adding MyanPay plugin to your WordPress CMS. So save them in your computer with notepad or something like that. After that click done and MyanPay API requesting process is also done too.

My Account Send Money Request Money Merchant Services  Logout

[Overview](#) [Add Funds](#) [Withdraw](#) [Transaction History](#) [Problem Solving Center](#) [Profile](#) [Help & Support](#)

View or Remove API Signature [Back To Profile](#)

 **Developers: Do not share your credential information with anyone. Store in a secure location with limited access.**

For preconfigured shopping carts: Copy and paste the API username, password, and signature into your shopping cart configuration or administration screen.

For building custom shopping carts: Store the following credential information in a secure location with limited access.

Credential	ExpressCheckout
API Username	_miyam7123716667_myanpayAPI
API Password	DG215C5L0B7P6B2G
Signature	Q66rMu7x4Daw619143Zh3x853Vuay921xDDLpd795934i83RJfzk2mFAoWBy
Request Date	7/5/2016 3:21:17 PM

WordPress and WooCommerce Installation

Step 1: Please visit at www.wordpress.org/download/ to get the latest version of WordPress for your Website.

You need to install WordPress! First (as the framework) and then install and configure woocommerce. Woocommerce is compatible with WordPress 3.8 or greater.

If you need some help on installing WordPress. You will find help on this link

https://codex.wordpress.org/Installing_WordPress .

Step 2: After Installing the WordPress, go to the WordPress admin panel by type www.yoursitename.com/wp-admin at the address bar. Then hover on the plugin and then click on the add new. At the Add New page, fill **WooCommerce** at the search box.

The screenshot shows the WordPress admin interface. On the left, the 'Plugins' menu is highlighted with a red box, and the 'Add New' option is also highlighted with a red box. In the main content area, the search box contains the text 'WooCommerce' and is highlighted with a blue box. Below the search box, there is a link that says 'ip format via [this page](#)'.

Step 3: You will see the woocommerce there and click on the install button. In this photo the button was shown installed because I already install it.

The screenshot shows two plugin cards from the WordPress repository. The first card is for 'WooCommerce' by WooThemes, which is marked as 'Installed' (highlighted with a red box) and has 1+ million active installs. The second card is for 'WooCommerce Image Zoom' by wpbean, which is not installed and has 4,000+ active installs.

Step 4: MyanPay only accept Myanmar kyat. So you need to install **WooCommerce Currency Switcher**. Type **WooCommerce Currency Switcher** in search box and install it.

The screenshot shows two plugin cards. The first card is for 'WooCommerce Currency Switcher' by realmag777, which is marked as 'Installed' (highlighted with a red box) and has 10,000+ active installs. The second card is for 'WooCommerce Products Filter' by realmag777, which is not installed and has 10,000+ active installs.

Step 5: In the Plugin=>Add new at the admin panel, you will find upload plugin button at the top of the page and click on it.

The screenshot shows the 'Add Plugins' page in the WordPress admin panel. The 'Upload Plugin' button is highlighted with a red box. Below the button, there are two notices: one about Pinpoint Booking System and another about theme requirements. At the bottom, the search bar contains the text 'WooCommerce Currency Switcher'.

Step 6: You can download MyanPay Plugin at this address www.myanpay.com.mm/pub_DownloadPage.aspx . Browse the downloaded MyanPay plugin zip file and click install now button and wait for a little while to complete the installation.

Step 2: In the Checkout tab, checked the box as the photo show below. And then click on the MyanPay.

General Products Shipping **Checkout** Accounts Emails API Currency

This theme requires the following plugins: *Revolution Slider* and *Visual Composer*.
This theme recommends the following plugins: [Contact Form 7](#), [Layer Slider](#), [MailChimp for WordPress Lite](#), [WP User Avatar](#) and [WordPress Post Type Archive Links](#).

Checkout Process

Coupons Enable the use of coupons
Coupons can be applied from the cart and checkout pages.

Calculate coupon discounts sequentially
When applying multiple coupons, apply the first coupon to the full price and the second coupon to the discounted price and so on.

Checkout Process Enable guest checkout
Allows customers to checkout without creating an account.

Force secure checkout
Force SSL (HTTPS) on the checkout pages (an SSL Certificate is required).

Step 3: In this page, fill API Username, API Password and API Signature that you got from www.myanpay.com.mm . You can change MyanPay mode to Live mode and Test mode. In Live Mode, it will connect to myanpay server and in Test Mode, it will connect to test server so that developer can test their site is working or not. For Test Mode, API key can be get from www.myanpay-virtualbox.com .

Enable/Disable Enable Myanpay Payment
