MyanPay API Integration with WordPress Woocommerce CMS

MyanPay API Generating

Step 1: Type www.myanpay.com.mm in your browser address bar. And type your business account username and password and click **Login** button.

The screenshot shows the MyanPay homepage. At the top is the MyanPay logo. Below it is a navigation bar with links: Home, Personal, Business, Developer, Login | Create an account |. Underneath is a secondary navigation bar with links: Getting Started, How MyanPay Works, MyanPay Account Types, How Much It Costs, Partner Lists, Contact Us, Help & Support. The main content area features a large banner with a couple giving thumbs up and the text "Start your online shop, Use MyanPay, Get Money". To the right of the banner is a "MyanPay Account Login" box. This box contains fields for "Username" (with the placeholder text "username") and "Password" (with masked dots). A red rectangle highlights both input fields and the "Login" button below them. Below the login box is a "Create MyanPay Account" button. On the left side of the main content area, there are three columns: "Getting Started", "How MyanPay Works", and "How much it costs". Each column contains descriptive text and a "Learn More" button.

Step 2: Please type the text below and Click the **Login** button.

This screenshot shows a verification step on the MyanPay login page. It features a box titled "Enter the text below." with a small lock icon. Inside this box, there is a blue rectangular area displaying the text "898d09". Below this, there is a text input field containing the same text "898d09", which is highlighted by a red rectangle. Below the input field is a "Login" button, also highlighted by a red rectangle. The background of the page shows the same navigation and header as the previous screenshot.

Step 3: Click **My Account** tab and click the **Profile**.

The screenshot shows the MyanPay user interface. At the top, the 'My Account' tab is highlighted with a red box. Below it, the 'Profile' tab is also highlighted with a red box. The user is logged in as 'miyamoto'. The account type is 'Business' and 'Unverified'. The balance is '00.00 Kyats'. The 'All Activity' section shows 'No Transactions' for the period 'Friday, July 1, 2016 to Tuesday, July 5, 2016'.

Step 4: Select the **Selling Preferences** Tab and Click **View API Access**.

The screenshot shows the 'Selling Preferences' tab selected, which is highlighted with a red box. The tab contains several sections: 'Shipping Address' (State: Yangon, Township: Other, Address Line: Thamine, with an 'Edit Shipping Address' link), 'Saved Buttons' (Go To: User Saved Buttons), 'Web Site Payment Preferences' (Go To: Web Site Payment Preferences), 'Custom Payment Page Style' (Go To: Custom Payment Page Style), and 'ExpressCheckout API Access' (Go To: View API Access). The 'View API Access' link is highlighted with a red box.

Step 5: You will see the API Access Page and **Request API Credentials**.

My Account | Send Money | Request Money | Merchant Services | Logout

[Overview](#) | [Add Funds](#) | [Withdraw](#) | [Transaction History](#) | [Problem Solving Center](#) | [Profile](#) | [Help & Support](#)

API Access [Back To Profile](#)

An API (Application Programming Interface) allows MyanPay software to communicate with your online store or shopping cart.

Setting up API credentials

The following options to integrate your MyanPay payment solution with your online store or shopping cart.

Request API credentials to create your own API username and password.

This option applies to:

- Custom websites and online stores
- Pre-integrated shopping carts running on your own server

[Request API Credentials](#)

Step 6: In the **Request API Credentials** Page, click the **agree** button.

My Account | Send Money | Request Money | Merchant Services | Logout

[Overview](#) | [Add Funds](#) | [Withdraw](#) | [Transaction History](#) | [Problem Solving Center](#) | [Profile](#) | [Help & Support](#)

Request API Credentials

API credentials consist of three elements:

- An API username
- An API password and
- Either an API signature

If you're using a shopping cart or solution provider, ask whether you need an API signature.

Request API signature

If your shopping cart or solution provider has asked for an API username, password and signature or if you're developing a custom shopping cart.

[Agree](#) [Cancel](#)

Step 7: Then, you will get the API username, password and signature. You have to use those in adding MyanPay plugin to your WordPress CMS. So save them in your computer with notepad or something like that. After that click done and MyanPay API requesting process is also done too.

WordPress and WooCommerce Installation

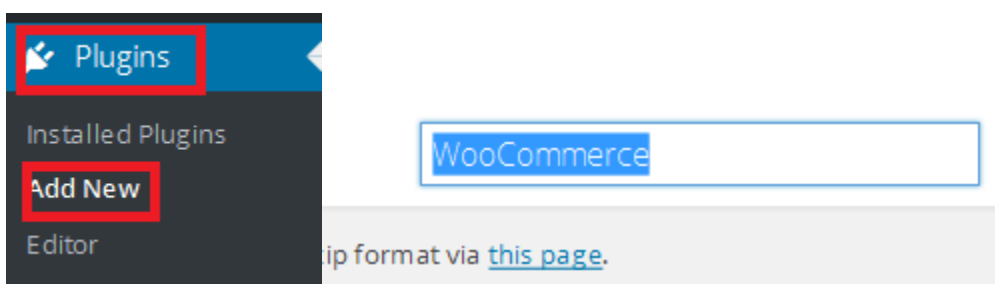

Step 1: Please visit at www.wordpress.org/download/ to get the latest version of WordPress for your Website.

You need to install WordPress! First (as the framework) and then install and configure woocommerce. Woocommerce is compatible with WordPress 3.8 or greater.

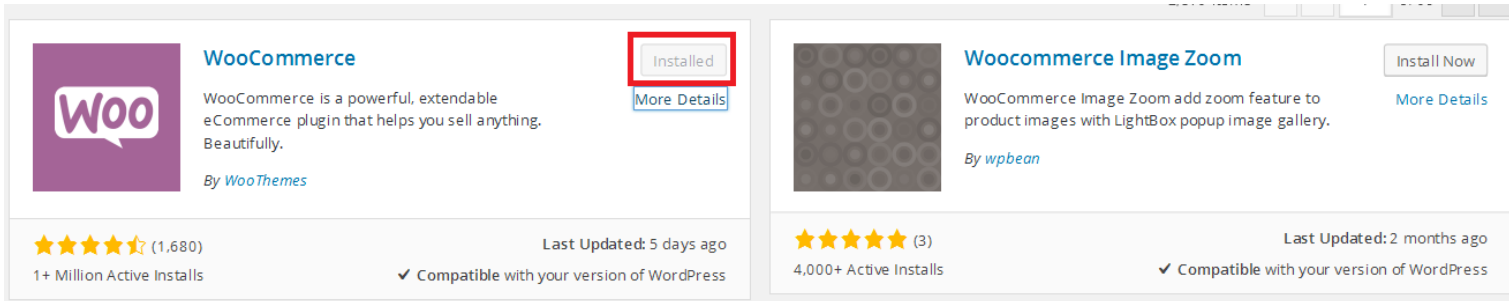

If you need some help on installing WordPress. You will find help on this link

https://codex.wordpress.org/Installing_WordPress .

Step 2: After Installing the WordPress, go to the WordPress admin panel by type www.yoursitename.com/wp-admin at the address bar. Then hover on the plugin and then click on the add new. At the Add New page, fill **WooCommerce** at the search box.

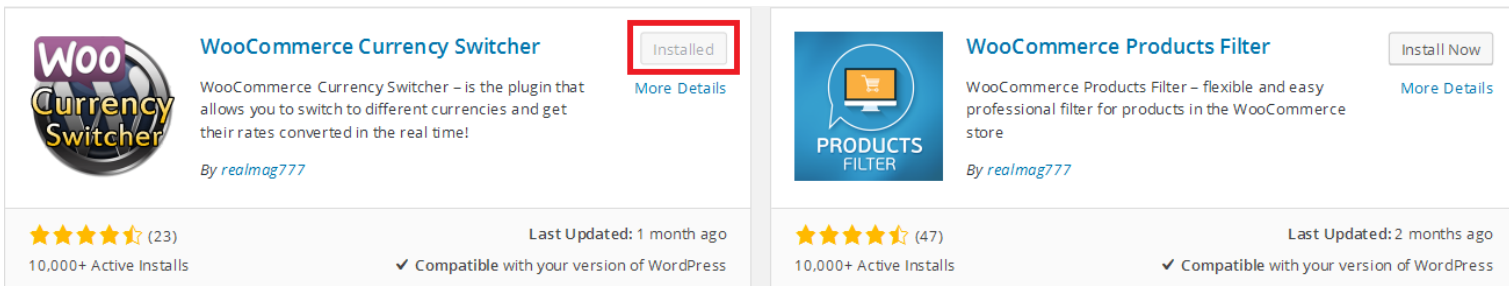

Step 3: You will see the woocommerce there and click on the install button. In this photo the button was shown installed because I already install it.

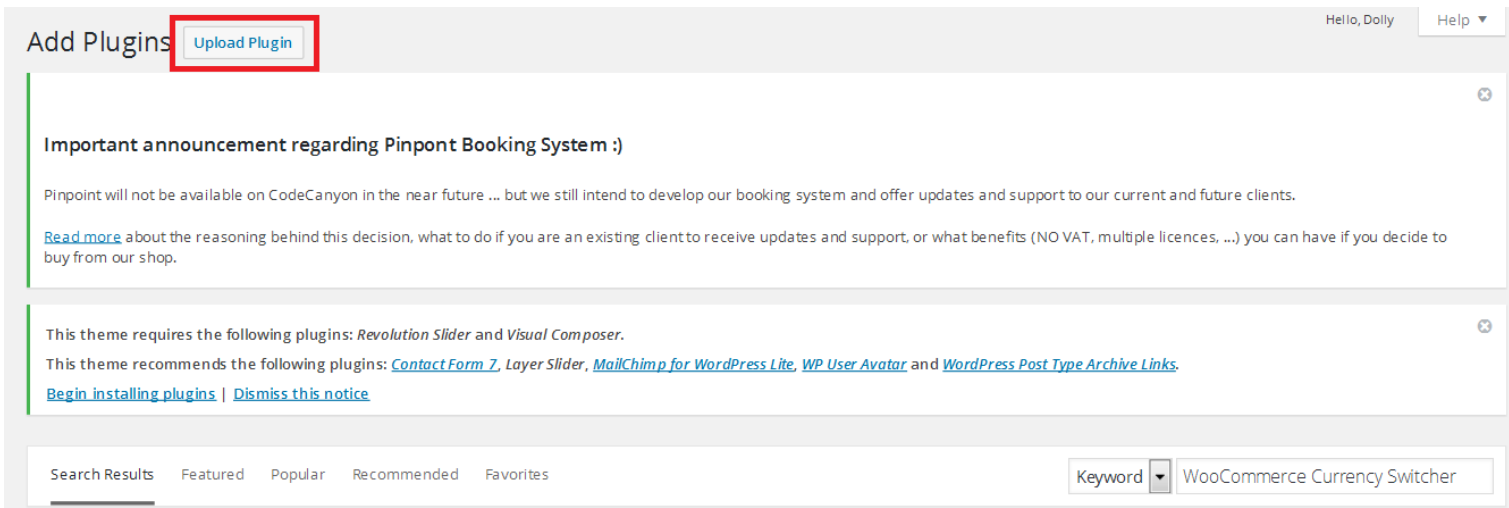

The screenshot shows two plugin cards. The first card is for 'WooCommerce' by WooThemes, which is marked as 'Installed' (indicated by a red box around the button). It has 1,680 ratings and 1+ million active installs. The second card is for 'WooCommerce Image Zoom' by wpbean, which has an 'Install Now' button and 3 ratings with 4,000+ active installs.

Step 4: MyanPay only accept Myanmar kyat. So you need to install **WooCommerce Currency Switcher**. Type **WooCommerce Currency Switcher** in search box and install it.

The screenshot shows two plugin cards. The first card is for 'WooCommerce Currency Switcher' by realmag777, which is marked as 'Installed' (indicated by a red box around the button). It has 23 ratings and 10,000+ active installs. The second card is for 'WooCommerce Products Filter' by realmag777, which has an 'Install Now' button and 47 ratings with 10,000+ active installs.

Step 5: In the Plugin=>Add new at the admin panel, you will find upload plugin button at the top of the page and click on it.

The screenshot shows the 'Add Plugins' page in the WordPress admin panel. At the top, there is a search bar with the text 'WooCommerce Currency Switcher'. Below the search bar, there is a section titled 'Important announcement regarding Pinpoint Booking System :)' and another section titled 'This theme requires the following plugins: Revolution Slider and Visual Composer.' The 'Upload Plugin' button is highlighted with a red box.

Step 6: You can download MyanPay Plugin at this address www.myanpay.com.mm/pub_DownloadPage.aspx . Browse the downloaded MyanPay plugin zip file and click install now button and wait for a little while to complete the installation.

If you have a plugin in a .zip format, you may install it by uploading it here.

Browse...

multi_myanpay.zip

Install Now

Step 7: Go to Plugin=> installed plugin in wp-admin panel to active the recently installed plugin and make sure to active the **MyanPay API Payment Method for WooCommerce, WooCommerce and WooCommerce Currency Switcher.**

<input type="checkbox"/>	MyanPay WooCommerce(MultiCheckout) Deactivate Edit	Extends WooCommerce to Process Payments with MyanPay's API Method.This is multichcheckout. 'When deactivating this module, it will remove all stored token'. Version 1.0.4 By MyanPay Visit plugin site
<input type="checkbox"/>	WooCommerce Settings Deactivate Edit	An e-commerce toolkit that helps you sell anything. Beautifully. Version 2.6.4 By WooThemes View details Docs API Docs Premium Support
<input type="checkbox"/>	WooCommerce Currency Switcher Settings Documentation Deactivate Edit	Currency Switcher for WooCommerce Version 1.1.7 By realmag777 View details
<input type="checkbox"/>	Plugin	Description

Configure the Setting

Step 1: We have to configure setting for the WooCommerce and MyanPay to use. Go to WooCommerce=>Setting in wp-admin panel. In that page click Checkout tab.

Checkout Process

Coupons

☒ Enable the use of coupons
Coupons can be applied from the cart and checkout pages.

☐ Calculate coupon discounts sequentially
When applying multiple coupons, apply the first coupon to the full price and the second coupon to the discounted price and so on.

Checkout Process

☒ Enable guest checkout
Allows customers to checkout without creating an account.

☐ Force secure checkout
Force SSL (HTTPS) on the checkout pages (an SSL Certificate is required).

Step 3: In this page, fill API Signature that you got from www.myanpay.com.mm . You can change MyanPay mode to Live mode and Test mode. In Live Mode, it will connect to myanpay server and in Test Mode, it will connect to test server so that developer can test their site is working or not. For Test Mode, API key can be get from www.myanpay-virtualbox.com .
